

METHOD AND SYSTEM FOR TESTING A SOFTWARE PRODUCT

Abstract of the Invention

A method and system for testing a software product is provided.

Specifically, a type template, an output template, and a table of test data

- 5 pertaining to the software product are provided. The test data is processed by a
test generation system based upon the type template and the output template to
automatically generate a test script file having at least one test case. The test
script file is then used to test the software product.
